## Tsuki adventure game guide

Double Fine, the gaming studio that brought you games like Psychonauts and Brutal Legend, have announced a new adventure game called The Cave that the company plans to release early next year for PCs, PS3 and Xbox 360s. The Cave is the brainchild of Ron Gilbert, the man behind seminal adventure games such as Maniac Mansion and The Secret of Monkey Island. We visited Double Fine HQ yesterday to get a first look at the game, and after watching Gilbert guide us through some basic play it's clear that The Cave is inspired by Gilbert's earlier work on PC adventure games. Like the Maniac Mansion, Double Fine's The Cave will allow you to choose several characters from a list of archetypes looking to explore a mysterious caveat for your own personal missions. These characters include traditional protagonists such as a knight and a scientist, but the list is rounded up by strange characters like a time traveler, a hillbilly, and a pair of rather creepy twins. Each character has his own special skills and his own story that will unfold as they explore the self-described caverns (yes, the cave of the same name talks to you) mysterious caverns and sultan. After introducing the game's characters and general premise, Gilbert narrated a brief demonstration of the game itself. In action, the game seems to be controlled as a Metroid or Castlevania-style platform that is about exploring strange environments, but the puzzle resolution segments were pure old school adventure games with the traditional traditional sense of humor of Double-Fine. A puzzle involved fixing a hot dog vending machine, but a hot dog then using this sausage to lure a dangerous monster blocking its path before quickly activating a claw mechanism that captures the beast. The short demo also saw players struggling with a sleeping (but still dangerous) dragon in a themed area around Knight before navigating past gates and other obstacles typical of adventure games. Since the game requires you to go spelunking with a custom three-character team (though not all at once; you can switch between them at will), The Cave will support a local multiplayer option that allows friends to take over controlling the second and third characters whenever they are on the screen. If you wander, there is no split screen mode; The Cave will simply follow a character and let go of the control of others until he returns to them or change the character he is controlling. Gilbert mentioned that the Double Fine development team worked hard to make these transitions seem natural and seamless, but without any practical time with the game it was the only part of the demonstration that left me more skeptical than excited. The cave should not be confused with Double Fine Adventure, the other Adventure company that raised more than \$3 million on Kickstarter earlier this year. Double Fine Adventure is still in its infancy, while the development of The Cave is significantly pre-double fine crowdfunding campaign. During our &Q&A; In Gilbert Gilbert his team has been working in La Cova for about a year; the game will be released by SEGA and is expected to be released in early 2013 on Xbox Live, the PlayStation Network and the PC (presumably via Steam). We will have more information about the game as its release is attracted; For now, take a look at some more screenshots of La Cova. Note: When you buy something after clicking the links in our articles, we may earn a small commission. Read our affiliate links policy for more details. Topics to explore: Adventure games advert are among the most unique of any game. They do not fit into any category or genre and often fit into several genres at the same time. The only real requirement for a game to be an adventure game is that it has to lead to an adventure. This describes most games. However, adventure is not a genre defined by a mechanic such as RPGs, first-person shooters, or sand games. Therefore, an adventure game could be anything. We've heard reader comments for years after writing this one, so hopefully we find some decent games that will lead you into a fictional adventure. If you're ready for a list of games that will do just that, here are our picks for the best adventure games on Android!80 DaysPrice: \$5,9980 Days is one of the best adventure games for Android. You play as an assistant to Phileas Fogg, Passepartout, and you try to circumnavigate the world in just 80 days. You can take airships, submarines, trains, and even mechanical camels. Players have to manage Phileas vitals while traveling around the world or run the risk of losing the game. The game plays at a fast pace and literally adventure around the world. In addition, also race other players to see who comes first. It's one of a kind of friendly game and well worth its price. It's also free through Google Play Pass if you have it. CrashlandsPrice: \$4.99Crashland is already among the best adventure games of 2016. You play as a space trucker called Flux. The game begins with you crashing on an alien planet. Your job is to regain your burden, build yourself a foundation, fight the bad guys, and save the world. It has plenty of game elements, including crafting, combat, RPG style character level, and you can even tame creatures to fight on your side. It is a deep game with a ton of content that can be played on both mobile and PC. The score of 4.8 on Google Play is accurate. This is also available on Google Play Pass if you use it. Evoland 2Price: \$7.99Evoland 2 is easily one of the best adventure games in recent memory. It transcends genres by including a lot of them. This includes 2D RPG, 3D hunting, business card, hack-and-slash, and many others. The game basically progresses through the various eras of play and each new also brings a new graphic style too. Its unique game keeps you guessing and is a nice overall experience. We recommend playing with a physical controller for the best results, though. The game is also is for sale so you will most likely pick it up for less

than your \$7.99 asking price. Genshin ImpactPrice: Free to playGenshin Impact is one of the newest adventure games on the list. It looks a lot like Zelda: Breath of the Wild. Players have a big, open world to explore with lots of missions and missions to do. Players even get a glider to travel larger distances. There is also a gacha RPG element to this one, but you get most of the characters through missions rather than random calls so it adds some flavor to the game. It looks good, the controls are excellent, and you will be adventurous through this for a long time. Grand Mountain AdventurePrice: Free/\$5.49Grand Mountain Adventure is one of the newest adventure games on the list. It is a ski game with elements of racing and exploration. Players ride the elevator on several tracks. Then ski the slopes and try to exceed the time requirement. However, you can also ski and see the sights. There are also hidden areas, five mountains (in the premium version), online leaderboards, and you can even do tricks when you hit the big air. The controls and perspective of the game are a bit strange at first, but not too difficult. The graphics are also superb and the game is smooth. You get the first mountain for free and you can buy the premium version to unlock the rest. Guardian TalesPrice: Free to Play Watch Tales is a retro style adventure game with hack-and-slash game mechanics and decent controls. Players wander through a world as they solve puzzles and discover the mysteries of the game. There are head scrambles, a decent story, and some funny little things you can do. It is reminiscent of an older Zelda game, but with some city building mechanics added. There is also social mechanics like guilds so you can chat with friends too. The game is based on some gacha mechanics, however, and can be a little irritating for free players. Monument Valley 1 and 2Price: \$3.99-\$4.99 each + \$1.99 for DLCMonument Valley 1 and 2 are two of the most popular puzzle-adventure games available. They move the levels around because each level is the puzzle. Players are treated to optical illusions, a vague but fun story, and consistent experience across two games. The first game includes standard history with a DLC (\$1.99). The second game is currently \$4.99. The only complaint we have is the length of the game. These games are a bit short. They are still very big games, but those who don't like short games can be frustrated with these. They're free via Google Play Pass too. OddmarPrice: Free/\$4.49Oddmar is a lovely adventure platform from the developers themselves of Leo's Fortune. You play like a viking fighter who wants to his honor. You venture through the game world in order to do just that. The game has smooth play, excellent controls and excellent level design. It also hits all the extras with hardware manager support, google Play Games cloud saves, and it offline once you get all the downloaded data. The game is a little short at only 24 levels, but each level has a 3-star rating system to encourage replayability. You get a little bit of the game for free before you unlock the rest with a single purchase on the \$4.49OPUS seriesPrice app: Free/VariesThe Opus games are a series of three adventure games that tell a dark but poignant story. The first is Opus: The day we find Earth where you play like a robot trying to save humanity by returning to Earth. After that is the Whisper Rocket: Prologue that leads to Opus: Rocket of Whispers. The final game tells the story of two people who survived a plague who want to build a rocket to perform a space burial. The whole series is very good and the execution is one of the best we've seen. The games may be a bit precious, but you can start the games for free as a kind of demo before you buy the full title. Pokemon GoPrice: Free to playPokemon Go is one of the most ambitious adventure games. Actually go out into the real world and catch Pokemon, fight in gyms, plunder poke stops, and more. The adventure element is a little more literal in this game than others. It requires you to go places on your own and play the game in these locations. Players wander around the open world and catch Pokemon, fight in gyms, fight each other, trade pokemon, pick up various items and do all sorts of other things. The genre is also expanding and similar games can be played with Minecraft: Earth, Harry Potter: Wizards Unite, and Jurassic World Alive.The Room: Old SinsPrice: \$4.99Most of The Room games is no adventure games. The same cannot be said for the most recent game of the series, however. The room: Old Sins incorporates exploration elements along with its iconic puzzle structure. This gives you an extra dimension that previous games don't have. For the uninitiated, The Room is a series of games with gorgeous graphics, complex puzzles and archaic themes. The latest, One Sins, also supports Google Play Games hits, cloud saving, and more. This will be one of the best puzzle-adventure games of 2018 for sure. Rusty Lake (Cube Escape) SeriesPrice: Free/VariesCube Escape is a series of mystery-adventure games where you have to solve puzzles to find out what's really going on. It is also known as the Rusty Lake story and is actually playable online as a web game as well. The mechanics are quite simple and each game has the solution of a variety of puzzles in order to progress in history. It's technically they are escape games that means most of the time you'll be solving puzzles. However, it is an excellent series of games. We include it in this list because the Cube Escape series is almost totally free in-app purchases, which makes it among the best at this price point. There are some premium games by developers too that are really good. Sky: Light Price Kids: Free to play heaven: Children of Light is a delicious adventure with decent graphics and a funny story. There are seven worlds to explore and there is even a social element where you can talk to other players. Other features of the game include cooperative play, various character customizations, various rehearsals to keep things cool, and an above average soundtrack. The social element is the main attraction here and being able to explore the world with people is a nice touch. Square EnixPrice: Free / VariesSquare Enix can write a heck of a narrative and its narration is one of the best in all games. As such, most of your mobile games make for excellent adventure games. Examples include Mana Adventures, Secret of Mana, Life is Strange, Final Fantasy: Brave Exvius, various Dragon Quest games, The World Ends With You, Final Fantasy XV: Pocket Edition, and many, many others. The aforementioned games span several genres, including RPG, puzzles, slice of life, and hack-and-slash. For some reason, half of Square Enix's library is under a different developer name than everything else. We have the one linked to all the Final Fantasy games and mobile ports of old RPGs. In any case, the Square Enix catalog doesn't have short games, really, so get ready to strap and play for a while. WitchSpring4Price: \$4.99WitchSpring is an adventure game that should probably be more popular than it is. You play as a witch who is also the ruler of an entire continent. Players explore the world, meet various characters and do various things. It's a surprisingly charming RPG from a developer who is much older in Korea than he is elsewhere in the world. There are actually four games in the series. The first two tell the same story but from different perspectives while the third and fourth games are independent participants that can be played without the need to play others. The games go from \$1.99 to \$4.99 each and are all pretty good. If we missed any of the best adventure games for Android, tell us in the comments! You can also click here to see our latest lists of Android apps and games. Lists!
